

# Kaiser Members Negotiate Great Pension Language

Bruce Corkum, RN, Kaiser

"The improvements to our retirement that we have negotiated in our union contract means that nurses are able to retire with a comfortable retirement income. Nursing is a physically and mentally taxing profession. The days when retired nurses live in poverty or are unable to retire because their retirement income would be too low need to come to an end. Every nurse deserves a secure retirement and I'm proud that we have been able to consistently negotiate improvements to our retirement."

Kaiser RNs have achieved the best retirement plans of any private sector nurses in the Portland Metro Area. Kaiser RNs receive significantly more income in retirement. They receive retiree healthcare benefits paid for by the employer. Unfortunately Legacy RNs are not entitled to these benefits.

After spending their whole career serving others, nurses should not face retirement with uncertainty. We all deserve a secure and comfortable retirement. It is time that Legacy nurses demanded through union contract negotiations, retirement benefits that eliminates this uncertainty.
